MEN IN BLUE BAG BRONZE, GOLDEN MOMENT FOR INDIA

Podium finish after 9-goal thriller ends 41 yr-medal wait!

A resolute Indian men's hockey team rewrote history, as it claimed an Olympic medal after 41 years, defeating a plucky Germany 5-4 to win the bronze in an edge-of-the-seat play-off match of the ongoing Games on Thursday. Determined to clinch a medal, the Indians made one of the most-memorable comebacks in the history of the game, fighting back from a two-goal deficit to turn the match in their favour.

It is India's third hockey bronze medal in the history of the Olympics. The other two came in 1968 Mexico City and the 1972 Munich Games

Congratulations TEAM INDIA!!!!

I don't know what to say right now, it was fantastic. The effort, the game, we were 3-1 down. I think we deserve this medal. We have worked so hard, the last 15 months were difficult for us also, we were in Bangalore and some of us got Covid also. We would like to dedicate this medal to doctors and frontline health workers who have saved so many lives in India

MANPREET SINGH, SKIPPER

WRESTLER RAVI DAHIYA SETTLES FOR SILVER AFTER LOSING FINAL TO WORLD CHAMPION UGUEV

Ravi Dahiya on Thursday became only the second Indian wrestler to win a silver medal at the Olympic Games after he lost the men's freestyle 57kg title clash 4-7 to reigning world champion Zaur Uguev. There were expectations that the 23-year Dahiya would become India's youngest Olympic champion but the Russian defended well to win comfortably.

■ Sushil Kumar is the only other Indian wrestler to have made it to the final at Olympics. ■ He had won a silver at the 2012 London Games, where Yogeshwar Dutt also won a bronze. Sushil had won a bronze at the 2008 Beijing Games. ■ India now have five Olympic medal winning wrestlers. ■ KD Jadev had won a bronze in the 1952 Helsinki Games. Sakshi Malik had become the first woman wrestler to win an Olympic medal when she clinched a bronze at the 2016 Rio Olympic Games

Feel the tremor? India's 1st quake early warning system launched

India's first earthquake early warning system that will give people a head start of 10 seconds in the event of a tremor went online from Wednesday in Uttarakhand, giving people just enough time to get out of buildings and into open spaces when an earthquake strikes.

■ The Uttarakhand Bhookamp Alert app, which will be India's first and on the lines of such earthquake early warning systems in place in Japan, Mexico and the US, will collect and collate seismic data from 200 sensors across the Main Central Thrust zone (a major geological fault in the Himalayas), which will be sent to a control unit at IIT-Roorkee, if the quake is of 5.5 magnitude or more

■ This will then be disseminated as a warning for an impending quake via mobile phones, with a 10-second buffer. The app will notify people of the magnitude and origin of the quake, while counting down how much time one has. Once that time is up, an "I need help" red button and an "I am safe" green button will be displayed. Based on that, first responders can plan rescue operations

Uttarakhand falls in the category IV and category V seismic zones, which are considered the most active. In fact, of the nearly 59% of India's landmass that is prone to earthquakes, close to 29% falls in the category IV and V seismic zones

BRAINLESS 'BLOB' IS GOING TO SPACE

A single-celled yellow slime called 'Blob' is set to blast off to the International Space Station (ISS) where astronauts will study how it learns and adapts despite being brainless. One of the studies will see how Blob behaves in a microgravity environment without food and the other with which it will be given oat flakes.

SPACE
The mold, or *Physarum polycephalum*, has become highly-interesting to the scientific community due to its ability to think, make decisions, sleep, learn and even navigate a maze

With \$1.7 bn, Rihanna is the richest woman in music

Pop star Rihanna, with a net worth estimated at \$1.7 billion, has become the richest woman musician in the world, Forbes magazine said. The Barbados-born singer, whose birth name is Robyn Fenty, derives an estimated \$1.4 billion of her fortune from her 50% stake in the Fenty Beauty cosmetics line, Forbes reported.

MUSIC
The singer of 'Umbrella' and 'Love the Way You Lie' ranks second behind Oprah as the richest female entertainer, Forbes said

TRAVEL: UK TO MOVE INDIA FROM RED TO AMBER LIST

The UK government has announced that it will move India from the red to the amber list, in the country's latest update to the 'Red-Amber-Green' traffic light ratings for arrivals into England, amid the Covid-19 pandemic. This means that the visit visas for the UK from India are open, in addition to other long-term visas that have remained open.

FILM FESTIVAL TO SHOWCASE PRE-INDEPENDENCE SCIENCE

Swatantrata Ka Amrit Mahotsav Ka Vigyaan Filmstov, a science film festival to highlight the role of Indian scientists, science communicators and teachers in the Indian Independence movement will be held between August 13 and 15 to mark India's 75th year of Independence. This film festival, organised by Vigyan Prasara, is part of the year-long festivities that would be dedicated to those scientists, science communicators and teachers who struggled and sacrificed their personal gains and careers against the tyranny of the British during the Indian Independence movement.

DISCOVERED Oldest example of applied GEOMETRY

A 3,700-year-old clay tablet featuring maths attributed to Pythagoras 1,000 years later has been discovered. Known as SI.427, it was discovered in the late 19th Century in central Iraq, but its significance had remained unknown until it was analysed in more detail by mathematicians from the University of New South Wales in Sydney, Australia.

- 1 The tablet, which dates from the Old Babylonian period (1900 to 1600 BC), includes maths that was used by surveyors to define land boundaries
- 2 Researchers believe it is a 'significant object', as it includes an example of what is now known as 'Pythagorean triples', used
- 3 to make accurate right angles, but 1,000 years before Pythagoras was alive.

A Pythagorean triple is three positive numbers: a, b and c. Triples are commonly written as (a,b,c) and a common example is 3,4,5. It is derived from Pythagorean theorem, where every right triangle has side lengths that satisfy $a^2 + b^2 = c^2$. Other triples include (5,12,13), (7,24,25) and (8,15,17)
